## About Leather S.A.S

We select the best leathers  
and skins for the world

We are a Colombian company created with the purpose of continuing the family legacy that began around the year of 1982 with one of the largest tanneries that the country had in the municipality of Villapinzón.

For 13 years **ABOUT LEATHER** has supported the work of small tanneries by taking their products to the international market exporting all types of Colombian leathers to more than 10 countries, being the leather tanned with hair our main product.

We work every day to innovate and to support our clients in their designs from the hand of an exceptional work group.
